SwissProt_41:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

COPACTOR: Pyildoxal phosphate (By similarity). MISCELLANEOUS: The enzyme is maximally active at pH 4.7. The activity is stable at acidic pH values; there is no activity i the neutral pH range. At pH 4.1 the enzyme activity iss retain at temperatures up to 70 degrees Celsius.

                                                                                                                                                                                                                                                                                                                                                                                                                     FUNCTION: Converts internalized glutamate to GABA and increase the internal pH. Involved in glutamate-dependent acid resistar in gastric fluid.

CATALYTIC ACTIVITY: L-glutamate = 4-aminobutanoate + CO(2). COFACTOR: Pyridoxal phosphate (By similarity).

SIMILARITY: BELONGS TO THE GROUP II DECARBOXYLASE FAMILY (DDC, GAD, HDC AND TYRDC).
